#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3723

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 6-11, and 13-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Kelleway.

Kelleway shows a hand tool having a first handle member 11 divided into two legs at the upper end, a second handle member 10 having a first jaw member 13, a floating head portion 17 pivotally attached to the first and second legs and having an upper curved edge, two matching lever bars 21,22 are pivotally connected to the second handle 10 and the floating head member 17. The relative length relationships recited in the claims appear to be identical to those shown in Kelleway.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 3, 5, 12, and 17-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kelleyway in view of Chen et al.

Chen et al teaches that a plier tool having jaws may have a claw attached to one of the jaws.

To include a claw to either of the jaw members of Kelleyway would have been obvious for one skilled in the art at the time the invention was made in view of the

disclosure of Chen et al. One of ordinary skill in the art would have been motivated to do this in order to provide the plier tool of Kelleway with an additional use and, therefor, make the tool more versatile; ie., to additionally enable the tool to be used for pulling out nails. The relative length relationships recited in the claims appear to be identical to those shown in Kelleway.

Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert C. Watson whose telephone number is 571 272-4498. The examiner can normally be reached on Mon. - Thurs. , 5:30am - 4:00pm.
